

# Your innovative marine solutions and port services partner

## Providing solutions not just services

Total AMS (TAMS) was founded in 1999 as a specialist mooring installation and maintenance contractor, offering commercial diving services and mooring systems. Today, TAMS have expanded our capabilities, offering a diverse range of marine related services to the resources, oil and gas and civil infrastructure industries.

TAMS point of difference stems from the individual excellence of our business divisions, and the collective strength we present as a whole, underpinned by our unwavering commitment to operational excellence, ensuring even the most complex scopes are executed on time, under budget and to the highest levels of HSEQ.

Whether you need one of our services or all of them, we put the power of our experience, innovation and flexibility in your hands. We have the marine fleet, the teams and the support systems to assess your requirements, assemble the right equipment, and meet your deadlines, anywhere around the coast of Australia

TAMS remains proudly 100% Western Australian owned, headquartered in Fremantle WA.

## Marine Construction

TAMS delivers complete marine solutions combining in-house project management and engineering expertise with extensive marine capabilities to take on even the most challenging tasks, including;

- Marine piling
- Wharves & loadout facilities
- Navigation aids
- Shore crossings & pipeline installation
- Fender systems
- Caisson installation
- Marine structure deployment
- Inspection, maintenance, repair & decommissioning

## Offshore Support

TAMS services the offshore industry with port and logistics solutions as well as providing marine support associated with construction and decommissioning, resupply, hotshot cargo runs and crew transfers.

## Dredging

TAMS provides specialised dredging capability, servicing local ports and waterways, reinstating and maintaining their navigable depth. Our diverse fleet of dredging & seabed levelling equipment, coupled with our in-house hydrographic survey capability provides flexibility and optimisation with scopes including;

- Capital, maintenance & environmental dredging
- Ploughing & sweeping
- Wrack removal
- Breakwaters & rockwalls
- Reclamation & replenishment

## Mooring Design & Installation

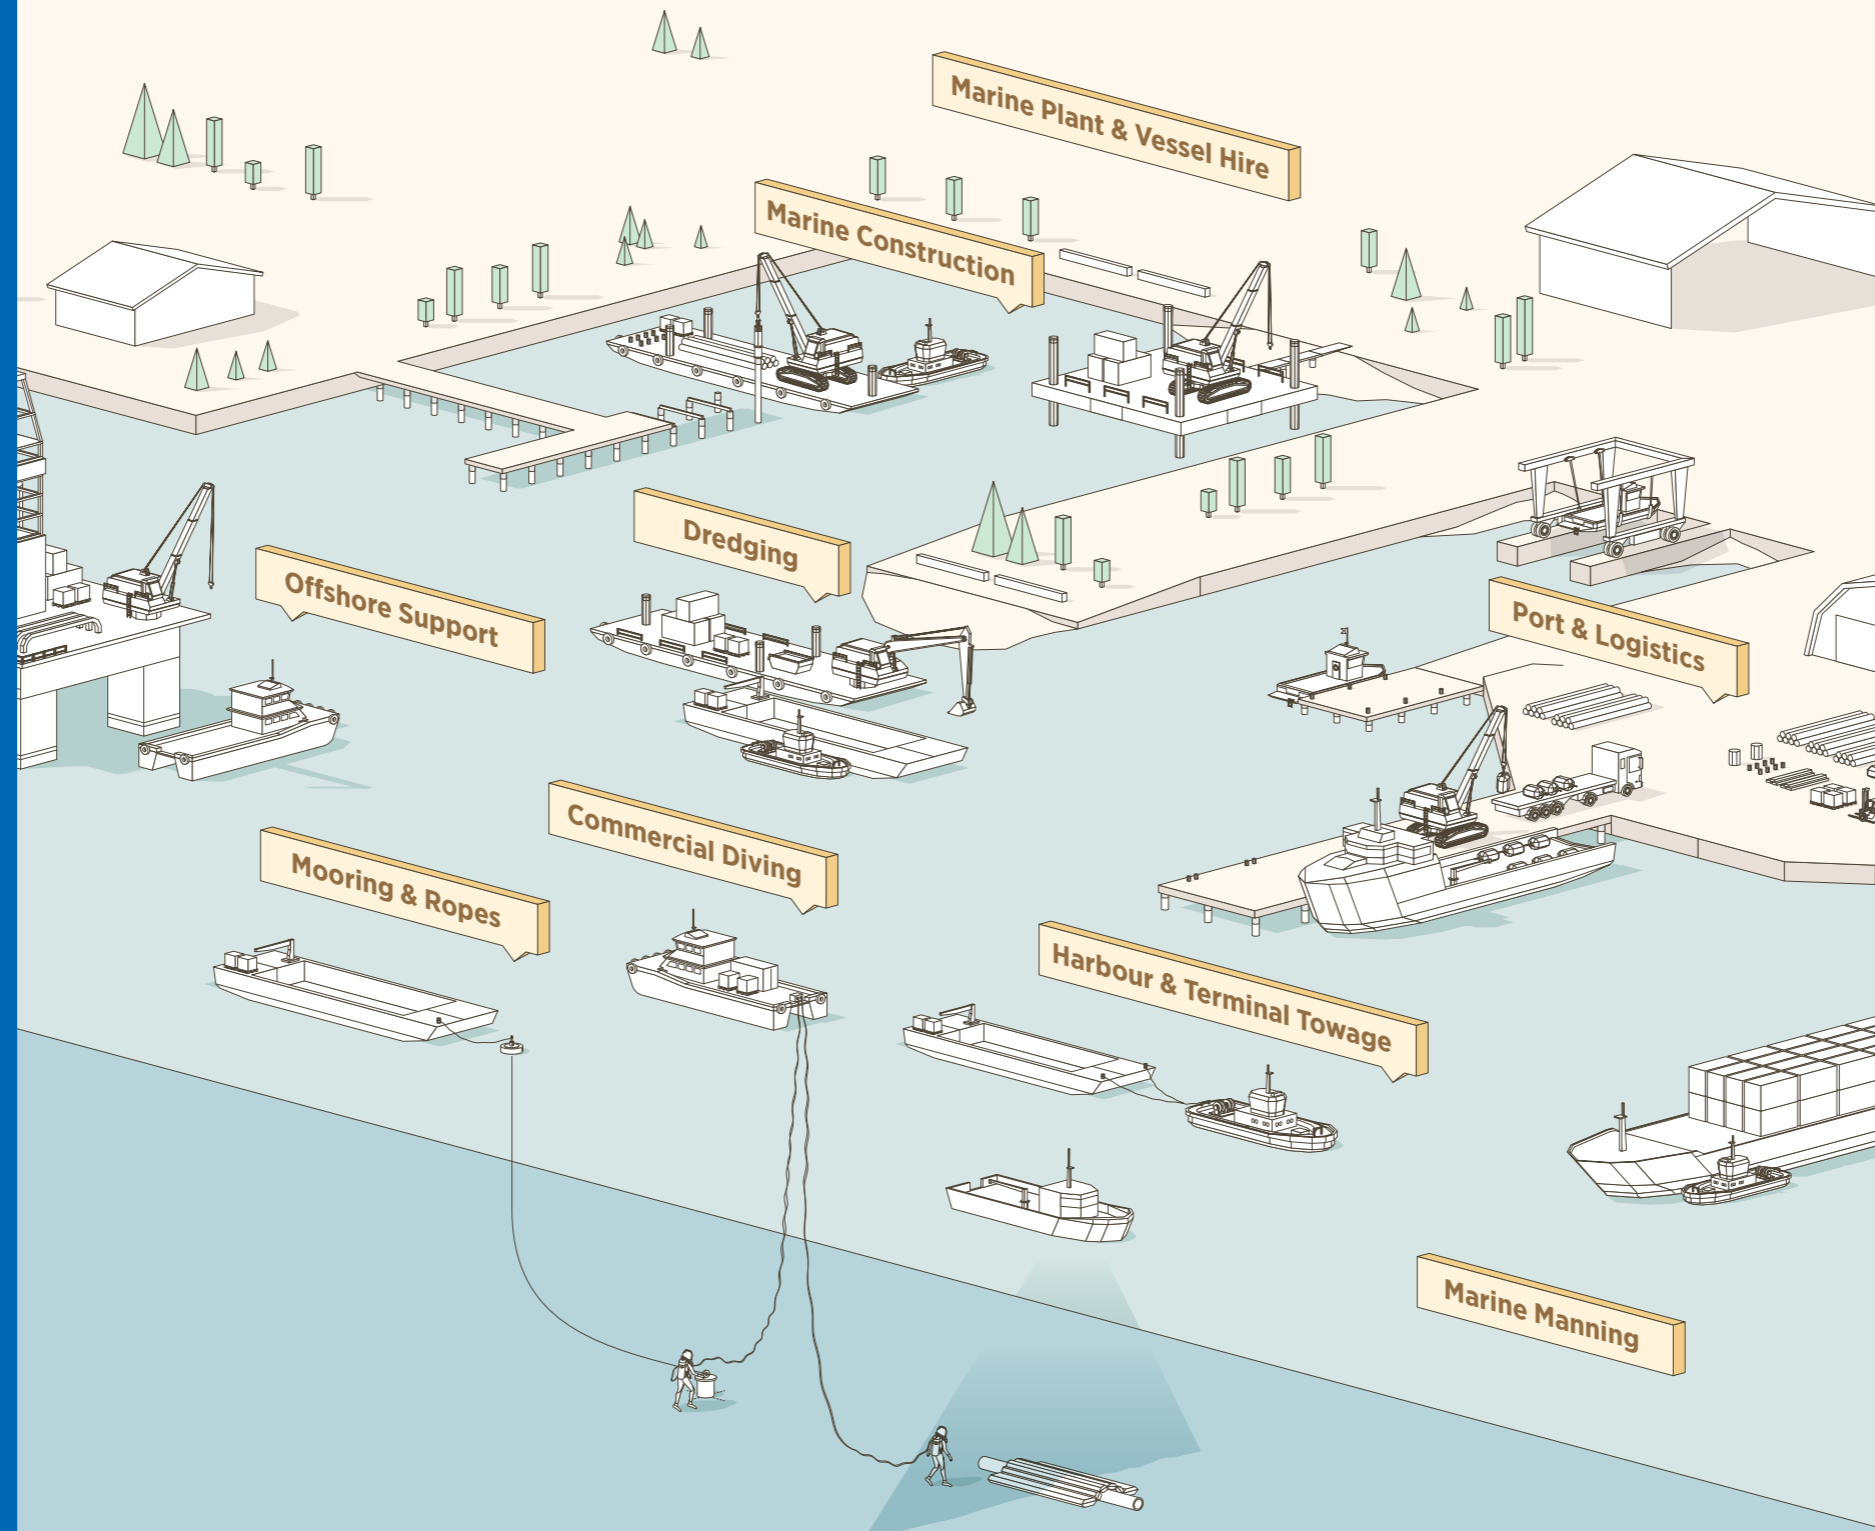

TAMS offers conventional and innovative moorings, from reduced environmental impact single pile solutions - suitable for marine parks through to 250T cyclone-rated moorings, to conventional 3 point anchor systems. Our end to end service includes design, engineering, procurement, installation, licencing, and ongoing inspection and maintenance.

- Mooring consultancy & design
- Installation & relocation
- Anchor & mooring hire
- Annual & 5 year inspection & maintenance
- Mooring retrieval & decommissioning

## Ropes

TAMS provide commercial marine rope supply and application support, including on-site technical service. As a lead Australian fabricating distributor for Samson Rope Company (USA) and DSR Corporation (Korea), we maintain a large inventory of high quality fibre ropes. Products and services include;

- Fibre rope consultancy
- High performance synthetic tow and berth lines
- Mooring hawsers and hardware
- Load, fatigue & NATA testing
- General & technical splicing
- Custom solutions & technical support
- Wear sleeves chafe protection
- Synthetic lifting slings

## Port & Logistics Support

From project mobilisation / demobilisation to ongoing vessel operations support and quay side logistics, TAMS provides shore side support from bases in Fremantle, Onslow and Port Hedland. Services include;

- Heavy lift wharves
- Mobile craneage
- Secure laydown and storage
- Berthage
- Slipway, lift / refit capability
- Plant & equipment hire
- Skilled trades
- End to end waste management
- End to end freight management
- Quarantine control capability

## Marine plant & vessel hire

TAMS extensive and diverse fleet of vessels, barges and other marine plant are available to support a wide range of operations on a short or long-term basis, whether ad-hoc or on regular scheduled charter periods.

## Marine manning

TAMS offers a full marine manning service. From a single employee to a complete marine project workforce, TAMS has the ability and experience to support your operations, providing highly skilled, suitably qualified, experienced personnel together with the associated logistics and management.

## Harbour & Terminal Towing

The diverse range of tasks we undertake necessitates a complementary marine fleet, crewed by masters, engineers and personnel qualified for Australasian coastal operations. Services include;

- Harbour & escort towing
- Ships line running
- Crew & Pilot transfers
- Port security
- Oil spill response
- Anchor handling
- Cargo transfers
- Victualling services
- Port infrastructure maintenance

## Commercial Diving

TAMS diving services maintain a strong reputation for safety, professionalism and responsiveness. Working across a wide range of industries, meeting industry demand for enriched air nitrox diving, TAMS extends this capability across all systems to optimise operational efficiency whilst subsequently minimising risk. TAMS operates in accordance with Australian Standard AS2299.1 and industry best practice.

TAMS DSMS is endorsed by the WA Department of Mines, Industry Regulation and Safety. We are accredited by international Classification Societies DNV GL, BV, Lloyd's Register and ABS for in-water surveys.

Our experience and capabilities include;

- Subsea inspection, maintenance & repair
- Subsea welding & thermal cutting
- Subsea dredging / airlifting
- Scour protection & grouting Salvage & asset recovery
- Cathodic protection installation, inspection & maintenance
- UWILD survey inspections
- Invasive marine species inspection

TAMS are accredited by international Classification Societies for in-water diving surveys

Maintaining a focus on health, safety, environment and quality programs and outcomes, our business is underpinned by a team culture that actively promotes safety. This can-do attitude combined with a recruitment strategy that focusses on selecting talented individuals, who share our Groups Vision and core values of delivering safe and quality driven service offerings, is central to sustaining the TAMS exceptional safety standards.

TAMS is a Quality endorsed company having ISO9001:2008 certification with QAS International.
